About me

Frontend Web Developer with a solid understanding of **HTML**, **CSS**, **JavaScript**, **React** and **NextJs**. Passionate about building responsive, user-friendly, and modern web applications while continuously expanding my knowledge of **React**, its ecosystem, and other web technologies. Experienced in developing personal and academic projects, writing clean and maintainable code, and collaborating effectively within a team. Eager to take on new challenges, grow as a developer, and contribute to creating high-quality digital experiences.

- JavaScript
- Type script
- JSON
- Git
- scss module
- Tailwind css
- HTML
- CSS
- Figma
- MySQL
- Python
- C++
- QT C++
- C

Projects

Academic website

March 2026

Developed the frontend of an **academic web platform** in collaboration with a backend developer. Implemented authentication, role-based protected routes, dashboard navigation, reusable components, toast notifications, and client-side routing using **React**. The project's primary repository is private.

https://github.com/alirezashojaian1987/SABAQ_Front.git

Expense manager

May 2026

Developed a personal **finance web application** for tracking income and expenses, featuring transaction management, custom categories, advanced filtering, data visualization with pie and line charts, and PDF/CSV export functionality.

https://github.com/alirezashojaian1987/Expense-manager.git

Fake store API shop project

February 2026

Developed a simple web application using **React** and the **Fake Store API**. Implemented dynamic product listing, product detail pages, category-based filtering, and responsive navigation. Integrated API data fetching to display products.

https://github.com/alirezashojaian1987/Product-suggestion.git

Quiz app with opentdb api

Developed a responsive **Quiz Web** Application using **HTML, CSS,** and **JavaScript**, integrated with the **OpenTDB API**. Implemented customizable quiz settings, dynamic question fetching, score calculation, and a final results page.

https://github.com/alirezashojaian1987/Quiz-app.git

Learning English website

Developed the frontend of an English learning web application using **Next.js** and **Django REST API**. Implemented authentication, user approval flow, responsive interfaces, and role-based dashboards for students and tutors.
